University of Karabuk

# NURHAK ŞEKERCİ

WEB  
DESIGNER

I want to continue improving my knowledge and experience in the field of software development and learn new technologies to use them in my projects. My goal is to become a leading figure in software development and contribute value to the software industry.

Below, I have summarized the steps I will take to achieve this goal:

1. I will constantly strive to improve myself by staying updated about the latest trends and technologies in software development.
2. I will seek opportunities to learn new technologies and apply them in my projects. I will expand my network by learning from and connecting with leaders in the software development field.
3. I will continuously update my resume and portfolio to position myself as one of the top talents in software development.
4. Additionally, I will volunteer to share my knowledge and experience in software development. This will not only help other developers but also contribute to my own growth.

I believe that by working hard and staying dedicated, I can achieve these goals and make meaningful contributions to the software industry.
